

With Data Express, you take advantage of Forward Advantage deployment resources, saving you valuable time, and delivering data to your physicians quickly and efficiently. Enjoy the benefits of our project expertise as well as our MEDITECH relationship, including the following elements of your deployment:

- **Evaluate** the ambulatory EMR specifications to ensure all data is available, and validate the delivery method supported by the EMRs (HL7 data streaming or FTP HL7 file).
- **Coordinate** with MEDITECH if data discrepancies exist based on the specifications to ensure issues are addressed prior to deployment.
 - *Because Data Express was developed with MEDITECH, MEDITECH is committed to working with Forward Advantage to make any market-driven or standards updates to the interface, with no additional charge to you.*
- **Participate** in testing your facility's connectivity with the physicians' EMRs or FTP sites.
- **Work** with you to ensure schedules are coordinated to include MEDITECH interface delivery as well as EMR resources.
- **Participate** in testing MEDITECH interface connectivity in your MEDITECH test environment.
- **Acquire** recipient information for the Routing Database, and import the recipient information.
- **Develop** output formats for physicians' EMRs based on specifications.
- **Work** with you to ensure schedules are coordinated for MEDITECH to move interfaces from test to live.
- **Participate** in testing as you move from test to live.
- **Evaluate** any issues identified when sending data to physicians' EMRs, and communicate with MEDITECH if issues are identified with your MEDITECH data.
 - *Forward Advantage and MEDITECH work together to ensure all available MEDITECH data is provided for your deployment.*
- **Celebrate** your physicians' satisfaction upon your successful Data Express deployment!
