

FOXMAIL

Retain Your MAGIC Office E-Mail as You Transition to 6.0 with an Affordable Alternative to Microsoft Exchange

MEDITECH MAGIC customers migrating to 6.0 want to retain their MAGIC Office (MOX) e-mails to help ensure consistent workflow during transition. These organizations are looking at e-mail solutions like Microsoft Exchange; however, these solutions often come with a high price tag and unused functionality.

The Solution

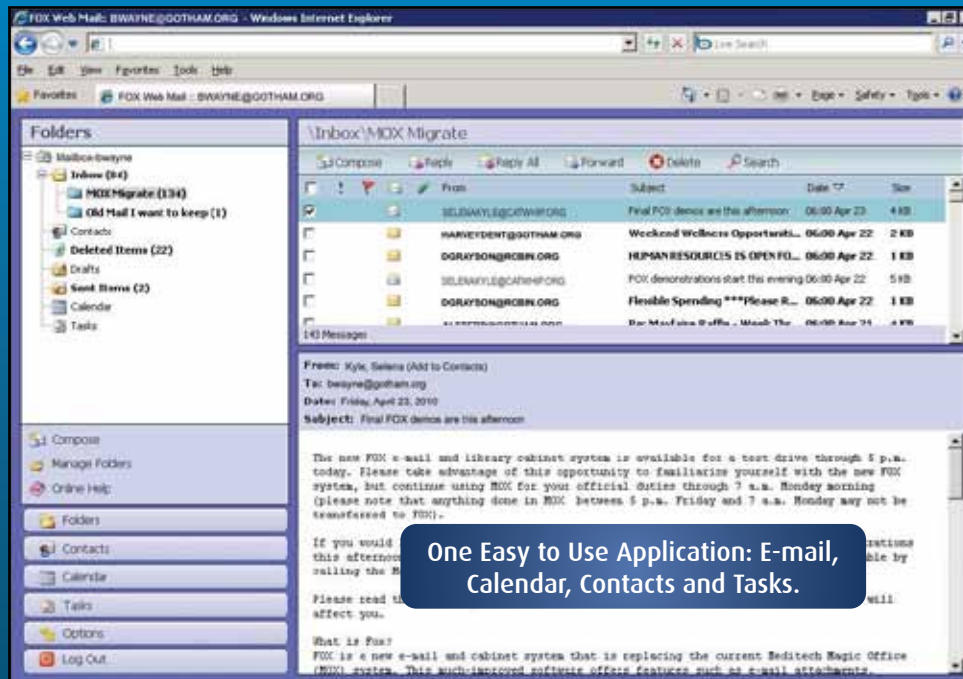

Forward Advantage's FOX Mail is an affordable, Web-based alternative to Microsoft Exchange. This solution allows hospitals to retain their e-mail investment by carrying over distribution groups and converting MOX messages to FOX Mail. No client software is required with FOX Mail, and users can access their mailboxes on any computer using a Web-based platform with an Internet connection. FOX Mail provides users with all of the MOX Mail basics, but with much more functionality. Designed with hospital end users in mind, FOX Mail contains the functionality most used with Microsoft Outlook, such as: spell check, message drag-and-drop capability, and calendar and appointment set-up.

Connect to Microsoft Outlook with the FOX Mail Server

FOX Mail is a server-based e-mail system designed to meet various needs. Many MEDITECH customers choose to use FOX Mail exclusively throughout their organization. However, customers who feel strongly about using Outlook can cut costs by connecting to Outlook with the FOX Mail server, as opposed to Microsoft Exchange.

Key Features:

- Integrate e-mail, calendar, contact management, and tasks into one easy-to-use application
- Convenient user options: auto response messages and message redirection
- Schedule appointments and reminders with the calendar
- Comprehensive spell checker for messages
- Store and locate messages easily with folders
- Move messages with simple drag-and-drop features
- Integrates with Outlook and other POP3 e-mail presentation clients
