SmartLaunch

Seamlessly Access Archived Patient Data from Your EHR

Forward Advantage's SmartLaunch application alerts clinicians and other staff to critical patient information contained within third-party systems, including archived legacy systems. A click of a button provides streamlined access to this information without leaving your EHR. It's a valuable way to streamline clinician workflow for improved productivity and patient care, while also maximizing any HIE participation.

Key Features & Benefits

- Access the same patient's information from third-party systems and applications without leaving your EHR
- No need to exit and reauthenticate within your EHR or HIE
- Ease-of-use with minimal end-user data entry

- Flexible programming - alert caregivers to critical patient conditions or other information in third-party systems
- Patient care is improved with better access to information and greater clinical efficiency

The SmartLaunch button pairs well with Forward Advantage's Historical Archive Viewer, an efficient and affordable way to store and access legacy documents and scans. Together, they ensure that your clinicians and other staff have immediate access to the information they need for the best care possible.

Contact a Forward Advantage representative at *sales@forwardadvantage.com* or **877.636.7927** to discuss how SmartLaunch can work for your organization!
