Legacy Data Conversions and Migration Services

Streamlining Access to Historical Data

From Migration Services to Post-Migration Tools–We Have You Covered!

Often during a migration, healthcare systems are challenged to decommission a legacy system and create streamlined access to historical PHI. The good news is you don't have to go it alone! Forward Advantage can expertly handle your EHR migration or upgrade with solutions and services for a variety of needs.

Migration Experts

Forward Advantage knows just how important your data is. Our experts have completed more than **200** migrations and have extensive experience decommissioning a wide range of legacy systems. **Using our Historical Archive Viewer (HAV), we can extract all of your data at the beginning of the migration process, allowing you quicker access to important data, faster data validation and potential savings by moving up the decommissioning of your legacy system.** We use a unique approach that minimizes time and effort, while also minimizing cost and errors.

We break down the overall project into manageable tasks and work as an extension of your staff to ensure your success, working closely with your EHR vendor along the way.

- Complete project management includes data analysis, conversion setup & installation, testing and post go-live cleanup allowing your team to focus on other tasks

- Streamlined migration with our proprietary conversion process

- Unique approach reduces cost and complications by converting data to documents before migration

- Specialists in migrating scanned images and documents

- Experts at migrating data to and from many different systems and EHRs.

- Reduce need to maintain multiple systems
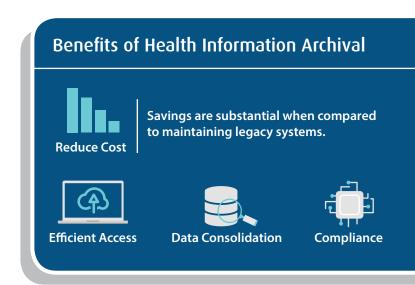

Tools to Streamline Access to Legacy and Third-Party Data

Historical Archive Viewer

The Historical Archive Viewer allows you to easily access and view important documents after your system has been decommissioned. A desktop application, the Historical Archive Viewer is an efficient and cost-effective alternative to maintaining legacy systems.

SmartLaunch

The SmartLaunch button, which appears on patient screens within the EHR. SmartLaunch alerts clinicians and other staff to important patient information contained within the Historical Archive Viewer and other systems, so they can access this information without leaving your EHR.

Benefits of Health Information Archival

Reduce Cost

Savings are substantial when compared to maintaining legacy systems.

Efficient Access **Data Consolidation** **Compliance**

Decommission Your Legacy Systems

We're experts at migrating your information so you can decommission legacy systems.

Contact a Forward Advantage representative at **sales@forwardadvantage.com** or **877.636.7927** to discuss how our Data Preservation and Migration Services can work for your organization!
