

# Find-It

## Optical Character Recognition for MEDITECH's Scanning and Archiving Application

Does your staff wish there was a better way to quickly find needed information in your business office documents? Do you have a large number of scanned images that are inaccessible due to the inability to search their content?

**Find-It** is an advanced content search tool that uses **optical character recognition (OCR)** technology to locate, retrieve, and identify business office documents (e.g., invoices, claims, and EOBs/remittances) stored within **MEDITECH's SCA** application. Find-It can be directed to any network directory containing scanned images and quickly incorporates legacy and newly added images to your search capabilities.

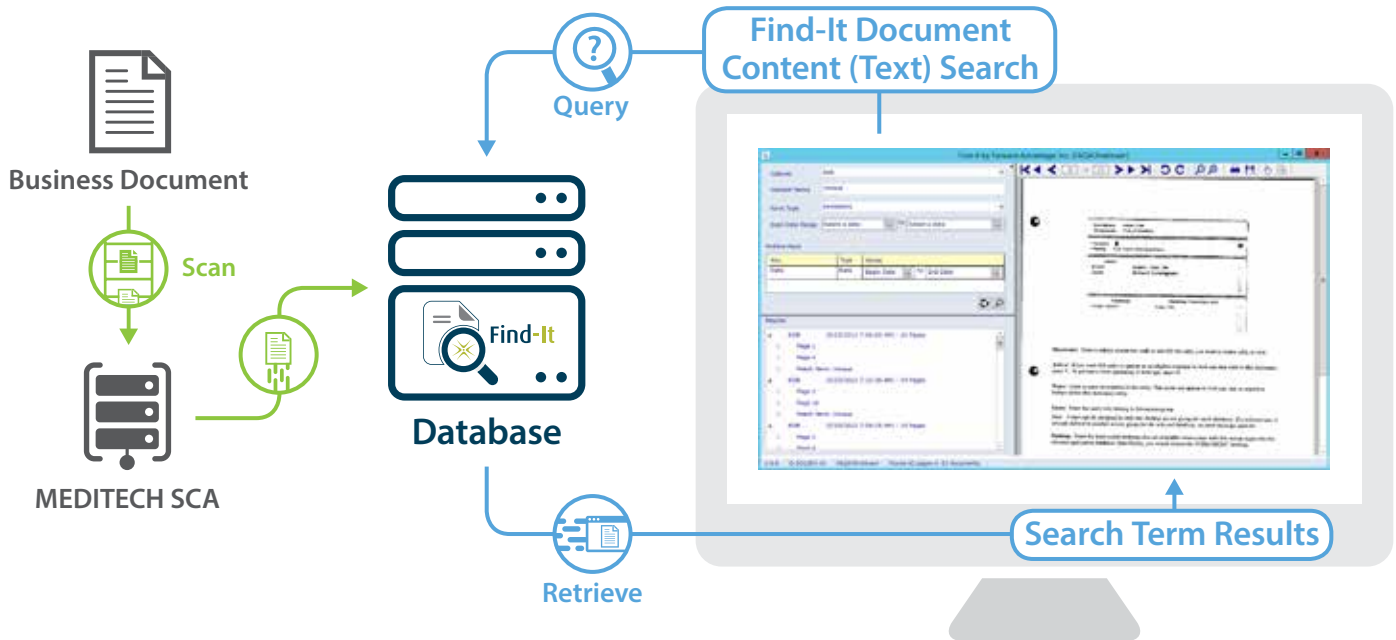

## Designed with MEDITECH

Find-It was designed in collaboration with MEDITECH to provide a streamlined workflow to meet the specific needs of MEDITECH customers. Find-It integrates with MEDITECH's SCA application and enhances search capabilities with content-based searches to help users quickly find and access business office documents. Find-It is available on the MEDITECH 6.x, C/S 5.x and MAGIC platforms for customers that have Business Office (BO) Scanning and Archiving.

## Key Features

- Search by OCR Text as well as a number of discrete data fields.
- Supports common image types including TIFF, PNG, and GIF.
- New User Interface for streamlined workflow.
- Works in conjunction with any Business Office application such as HR, MM, or AP.
- Redaction available for private information.
- Ability to print and download scanned documents.
- Zoom and page orientation settings retained per user by session.

## How it works
