# Legacy Data Conversions and Migration Services

MEDITECH Migration Partners

As a MEDITECH-preferred partner, our experts have completed more than 200 migrations and have extensive experience with MEDITECH Scanning and Archiving and decommissioning a wide range of legacy systems. We use a unique approach that minimizes time and effort, while also minimizing cost and errors. **Using our Historical Archive Viewer (HAV), we can extract all of your data at the beginning of the migration process, allowing you quicker access to important data, faster data validation and potential savings by moving up the decommissioning of your legacy system.** Plus, we will break down the overall project into manageable tasks and work as an extension of your staff to ensure your success, working closely with MEDITECH along the way.

FORWARD ADVANTAGE MIGRATION SERVICES AND SOLUTIONS:

- Migration of Documents, Images and Scans
- Archive Viewer
- OCR Searching for Back-Office Documents
- Report Generation and Conversion
- In-EHR Access to 3rd-Party Systems

MEDITECH **20+** years PARTNER

## Solutions to Fit Your Unique Migration Project

Whether you're looking to do a full migration to MEDITECH Expanse or bring up MEDITECH Scanning and Archiving (SCA), Forward Advantage offers solutions to make the processes easier, streamlined and, in many cases, cost effective.

FORWARD ADVANTAGE OFFERS EXPERTISE AND SOLUTIONS FOR:

- Migrating to MEDITECH SCA
- Migrating to MEDITECH Expanse Ambulatory
- Migrating to MEDITECH Expanse from another EHR
- Decommissioning a Legacy System
- Migrating to MEDITECH Expanse from Client/Server or Magic *

✱ SUCCESSFULLY MIGRATING FROM CLIENT/SERVER OR MAGIC

As you migrate to MEDITECH Expanse, Forward Advantage can help you generate reports out of MEDITECH MAGIC or Client/Server. There may be reports not sent to MEDITECH Scanning and Archiving (SCA Echart) in your older MEDITECH system that are needed for the legal medical record. We can help you extract those reports and convert them to the SCA Echart, as they may not have been converted by your standard data conversion in your move to Expanse.

# Tools to Streamline Access to Legacy and Third-Party Data

Historical Archive Viewer

The Historical Archive Viewer allows you to easily access and view important documents after your system has been decommissioned. A desktop application, the Historical Archive Viewer is an efficient and cost-effective alternative to maintaining legacy systems.

SmartLaunch

The SmartLaunch button appears on patient screens within the EHR. SmartLaunch alerts clinicians and other staff to important patient information contained within the Historical Archive Viewer and other systems, so they can access this information without leaving MEDITECH.

Benefits of Health Information Archival

Reduce Cost

Savings are substantial when compared to maintaining legacy systems.

Efficient Access

Data Consolidation

Compliance

FORWARD ADVANTAGE DIFFERENCE

※ **Unique approach reduces cost and complications** by converting data to documents before migration

※ **Complete project management** with Forward Advantage handling data analysis, conversion setup & installation, testing and post go-live cleanup so your team can focus on other tasks

※ **Streamlined migration** with our proprietary conversion process

※ **Experts in migrating to MEDITECH Scanning and Archiving** from other third-party vendors

※ **Specialists in migrating scanned images and documents**

※ **Preferred-MEDITECH partner** for MEDITECH Expanse migrations

※ **We can reduce your need to keep multiple systems operational**

Hear from Other MEDITECH Customers

"

We implemented the Historical Archive Viewer to view data that we are converting from an old Electronic Legal Record. We are migrating this data into MEDITECH with the help of Forward Advantage. The Historical Archive Viewer, along with the SmartLaunch Button, provides easy and convenient access to historical data for our clinical staff from within MEDITECH while we work on migrating the data into MEDITECH."

– Kim Hemphill, Senior Business Analyst at Catawba Valley

"

By converting our reports to MEDITECH, all reports can be retrieved from one system. Also, software and hardware support and maintenance with these vendors was becoming costly and/or unavailable. We wanted to free up our internal resources by not having to maintain these systems."

– Lupo Vaccarella, Corporate Manager of Financial Applications at CarePoint Health

"

Forward Advantage was very knowledgeable with regards to the migration and the data validation process. They worked well with our staff as well as our MEDITECH contacts which made the project run smoothly. I was impressed!"

– Betsy Eisenbraun, Project Lead at Mount Nittany Medical Center

"

There are a limited number of vendors currently in this market, and the ones that I talked to were made up of only one or two people. They certainly didn't have the strength in numbers that Forward Advantage has, and our concern was that they could drag the project out."

– Jason Youngbar, Senior Integration Programmer, Shore Health System

Whatever your need, Forward Advantage's experts have you covered! As a MEDITECH-preferred partner, we have decades of experience and know your system inside and out. This puts us in a unique position to use our expertise and proprietary tools for a highly efficient and cost-effective migration or legacy data conversion.
