

TOP 10

Things You Should Consider for Your
VIRTUAL DESKTOP INFRASTRUCTURE (VDI)

1

FAST LOGIN & RECONNECT TIMES

Are log-on times up to your expectations?

6

REMOTE ACCESS

How do you ensure that access is granted securely and appropriately?

2

SINGLE SIGN-ON (VDA)

Automate the long-in process and save time with no additional clicks.

7

END POINT & PERIPHERALS

How will you optimize for cost and usage while accommodating BYOD for a seamless experience?

3

ROAMING

Ensure that sessions follow end users with no unexpected consequences.

8

EXPERT RESOURCES

Do you have an experienced team to manage such a complex environment?

4

OPTIMIZATION

Is your VDI environment providing the experience your users expect?

9

OUTSOURCING

If you do have experts on your team, do they need additional assistance with their daily operations?

5

SECURE PRINTING

Print jobs should be available and secure at the desired location.

10

VDI FUTURE STATE

What is your vision for the next version?
