

OPTIMIZE MEDITECH WITH COLLABORATIVE SOLUTIONS FROM FORWARD ADVANTAGE

Forward Advantage and MEDITECH's 20+ year collaboration helps clinicians and other hospital staff access important information from MEDITECH when and where they need it.

Key market-leading solutions and services:

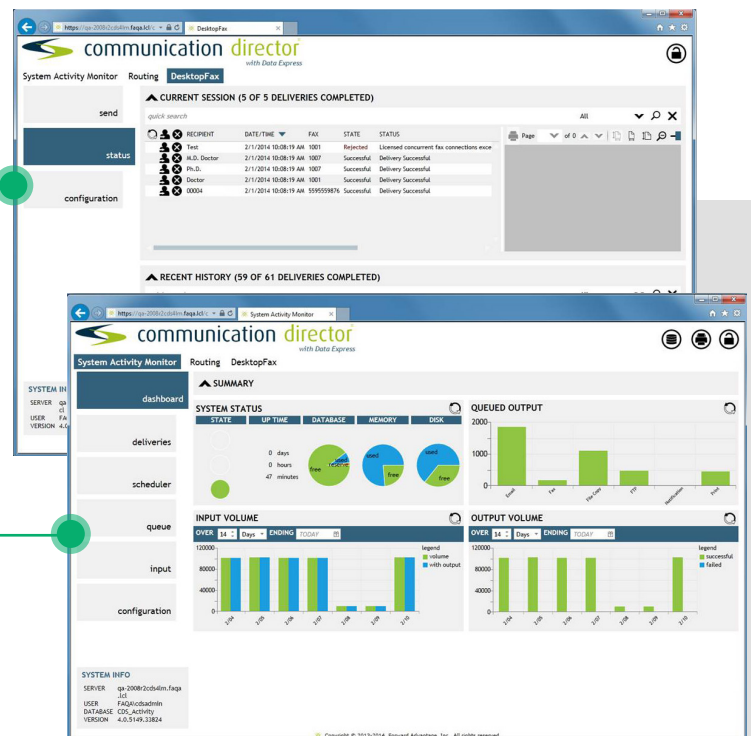

- Automated report distribution and information exchange
- Secure messaging
- Identity and access management
- Virtualization optimization
- Data preservation and migration

Solutions and services developed exclusively for MEDITECH include:

- Optical character recognition and advanced search capabilities for MEDITECH Business Office documents
- Integration to MEDITECH's Bed Board to improve housekeeping workflows
- Authentication management for secure and simplified access to MEDITECH
- Migration and conversion services for MEDITECH Expanse
- Integration to MEDITECH for a more complete patient record

Get the Right Information to the Right Person from Your MEDITECH System

- **Communication Director** – Automate the secure delivery of clinical reports and other information from MEDITECH. Care teams are notified, with their preferred communication method, of important PHI such as lab results, radiology reports, ADT notices, and more.
- **Secure Messaging Connectors** - Integrate Communication Director with secure messaging that automates distribution of patient information and alerts from MEDITECH to provider smartphones.

DOE, JANE (D001869) has been admitted to Memorial Hospital

Patient Name: Jane Doe
Patient DOB: 03/13/1963
Patient Age: 54
Patient Gender: Female
Patient MRN#: H00002846
Admit Date: 05/12/15 11:24
Discharge Date:
Location of Visit: BEDWAITED
Visit Reason: CHEST PAIN
Diagnosis:
Admitting Physician: Johnson, James
Attending Physician: Johnson, James
Primary Care Physician: Smith, John

Maximize MEDITECH in a Mobile Environment

Forward Advantage is MEDITECH's preferred provider and an authorized reseller for Imprivata and UniPrint solutions.

- **Imprivata OneSign** – A password management system that provides fast and secure authentication and access. OneSign eliminates the need to remember and enter application usernames and passwords time and time again, permitting faster access to patient information.
- **Imprivata Cortext** – This HIPAA-compliant text and image messaging platform provides simplicity and convenience for providers by syncing across smartphones, tablets, and desktops to suit different workflows. Message status and read receipts, along with persistent notifications and customizable sounds, ensure that critical patient information is never overlooked.

- **VDI Services** – Virtual Desktop Access enables MEDITECH hospitals to leverage the full benefits of their EHR and virtualization technology investments. Utilize Forward Advantage's experienced team to assess your specific needs and clinical workflow to deliver solutions with end-to-end support that ensure the success of your providers and virtual desktop strategy.
- **UniPrint** – A virtual print management solution that eliminates printer/driver compatibility issues, simplifying printer administration and end-user access. Physicians and other end users simply print to UniPrint and then authenticate at any printer throughout the organization to release the document. There are no worries about PHI sitting in an open area or wasting paper by printing to a wrong location.

Migrate and Preserve Legacy Data

- **MEDITECH Expense Migration** – Take the weight off your IT staff by completing your MEDITECH migration with help from Forward Advantage. With the necessary resources and MEDITECH experience, Forward Advantage has developed a unique set of tools and processes that can help you reach your goals faster and more cost-effectively.
- **Document Imaging and Scanning Conversion** – Forward Advantage helps MEDITECH hospitals preserve existing scanned images and MEDITECH archives as they migrate to the latest version of MEDITECH Scanning and Archiving.

Improve Workflow Efficiencies

- **RapidFiler** – Streamline the importing of documents into MEDITECH's EHR to ensure a complete patient record. Inbound faxes no longer need to be printed and scanned, which reduces manual processes, expense, and potential errors.
- **EPCS** – Imprivata Confirm ID allows physicians to prescribe controlled substances anywhere in the organization with no dual workflows. This ensures the right patient gets the right medications in a timely and secure manner. Confirm ID integrates with MEDITECH and works in any single sign-on environment using two-factor authentication. Comply with EPCS regulations while also eliminating inefficiencies and potential fraud caused by paper-based prescriptions.
- **Bed Stat** – Housekeeping can easily and efficiently update MEDITECH's Bed Board by simply using a telephone. Bed Stat uses interactive voice response for reporting bed status information in real time. This maximizes bed turnaround time for increased revenue and more efficient care.
- **Find-It** – Easily locate scanned business office documents with optical character recognition for MEDITECH Scanning and Archiving.

FORWARD ADVANTAGE HAS DEVELOPED A UNIQUE SET OF TOOLS AND PROCESSES THAT CAN HELP YOU REACH YOUR GOALS FASTER AND MORE COST-EFFECTIVELY.
