

The Leading Information Exchange Platform for Healthcare

Communication Director Platform

The best care possible starts with informed providers. This means the right information delivered to the right person at the right time. Communication Director is a comprehensive, cost-effective, and reliable enterprise-wide information exchange platform. It's a proven solution for automating the delivery of reports and other information so that providers always have the information they need to deliver the very best care possible.

Are You Challenged to Improve Information Exchange?

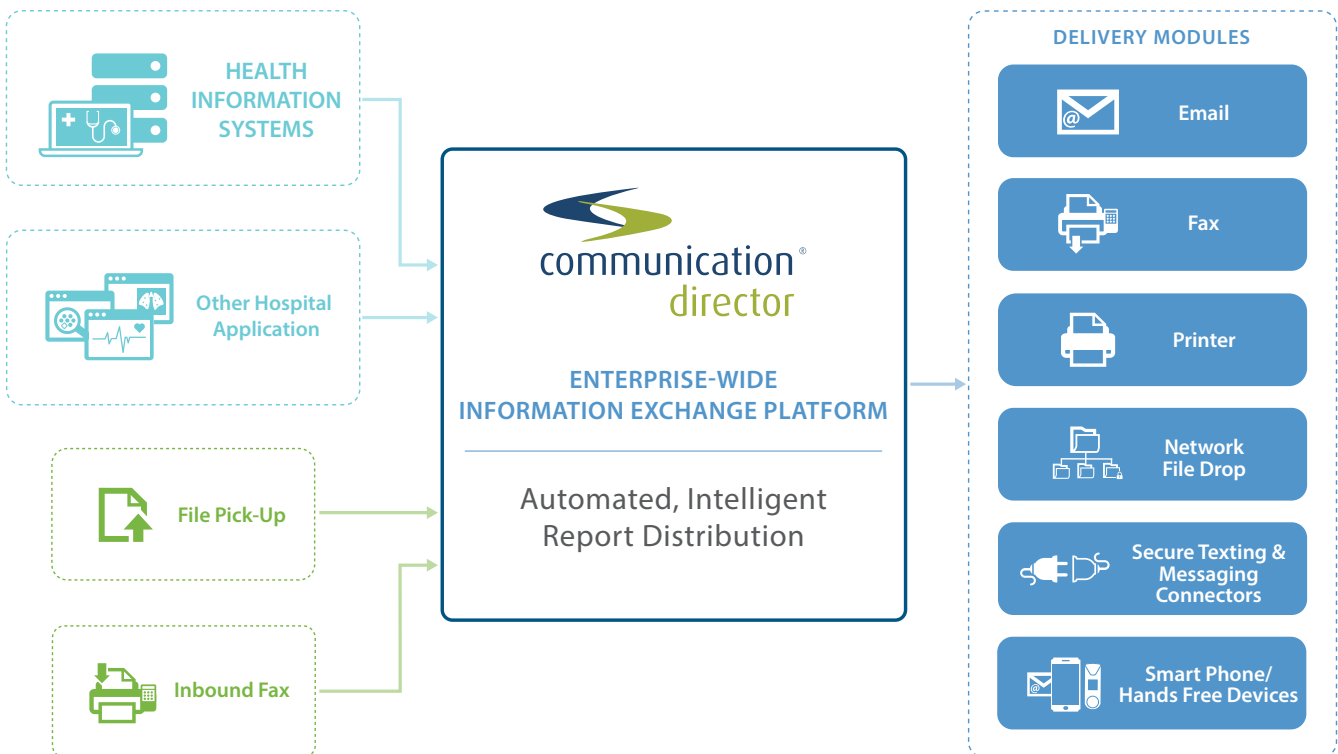

Forward Advantage listens to our customers and develops solutions designed to solve their unique challenges. If you answer "yes" to any of the questions, it might be time to take a closer look at all Communication Director can do!

- Are you looking to consolidate outreach communications to a single platform?
- Do you struggle to accommodate physicians with different information delivery preferences?
- Do you worry about physicians and staff texting unsecured PHI?
- Are you looking for ways to increase productivity and still maintain high physician satisfaction?

HOW IT WORKS

SmartRoute Technology Enables Intelligent, Automated Delivery

Let Communication Director do the work with SmartRoute intelligent routing. SmartRoute extracts key information from a report and automatically determines if, how and when the report should be delivered based on the unique requirements of your recipients. The system automatically delivers a large volume of reports and information with an accessible audit trail.

BENEFITS OF AN ENTERPRISE-WIDE INFORMATION EXCHANGE PLATFORM

Consolidated Communications

A wide-range of delivery options removes the need to maintain multiple systems to accommodate faxing, email, secure messaging, direct messaging, desktop faxing and many other popular distribution methods.

Real-Time Alerts

Provide a high standard of patient care with real-time results and automated alerts that notify physicians of any critical elements in a report.

Role-Based Access Controls and Auditing

Administrators manage users, set access, permissions, security settings and audit delivery statuses.

Cross-Department Integration

Easily integrates with all departmental software for consolidation of faxing, report distribution and automated notifications to one platform.

Streamline Clinical Workflows

Eliminate user intervention and streamline clinical workflows with SmartRoute technology that automatically determines the appropriate recipient and delivery preference.

Tailored for Healthcare

Inherently built to accommodate HIPAA regulations and the unique information distribution needs of healthcare systems and professionals.

24/7 Service Support

Expert technical support staff and a Customer Support Portal for online ticket management.

Browser-Based

Intuitive and easy to navigate browser-based platform.

A Browser-Based Platform with Integrated Solutions

For more than twenty years, Forward Advantage has continued to expand Communication Director with new modules and technologies that are customizable to meet unique customer needs.

Secure Texting and Messaging Connectors

Deliver EHR-generated information to mobile devices securely and automatically.

File Transfer Module

Transmit report files across your network via File Transfer Protocol (FTP), secure FTP, or the network file copy mechanism.

Inbound Fax Management

Distribute incoming faxes to the correct recipients via Network Print, Email and File Transfer.

DesktopFax Module

Extend faxing to any program that uses Windows® printing.

SmartAlert

Avoid delivery delays with round-the-clock monitoring.

Email Module

Deliver reports to recipients via email.

File Pick-Up Module

Allows for automated distribution of files that contain images and/or graphics from systems such as Philips Xcelera, Fuji Synapse, SAP Business Intelligence and Elekta MOSAIQ Oncology.

Email Module

Deliver reports to recipients via email.

Network Print Module

Delivers reports to network printers

Communication Director's built-in auditing has been an enormous benefit for us, because we can look at the system to show that a report was successfully delivered. It has really improved our accountability with our physician base."
