

# Imprivata Medical Device Access

Fast, convenient authentication for medical devices

## Key benefits:

- Improve security by enabling authentication to access medical devices and/or and transact with patient information
- Safeguard patient health information and meet compliance requirements by improving visibility into all user interactions with patient records on medical devices
- Increase workflow efficiency by replacing usernames and passwords with fast, automated authentication through the tap of a proximity badge

Interconnected medical devices are playing an increasingly valuable role in the delivery of patient care, enabling data to be captured, aggregated, transmitted, and analysed in real time. For example, patient monitoring devices used to capture and facilitate the electronic exchange of vitals to a patient's medical record.

With these advanced capabilities come new security threats, as each device represents a potential point of exposure of patient information. Requiring user authentication to access the device and/or transact with patient information improves security, but enforcing authentication through usernames and passwords creates a tedious, inefficient workflow that impedes the delivery of care. As a result, many organizations have elected not to enforce authentication, which leaves devices and patient data vulnerable.

Imprivata Medical Device Access addresses this challenge by enabling fast, convenient authentication. For medical devices already requiring user authentication, Imprivata improves efficiency by replacing the cumbersome manual entry of usernames and passwords with fast, automated authentication through the simple tap of a badge.

With Imprivata Medical Device Access, organizations can optimize their use of interconnected medical devices to improve the delivery of care while maintaining security and meeting compliance requirements, as well as improving efficiency for clinicians and giving them more time to focus on patient care.

## Seamless integration with leading medical devices

Imprivata Medical Device Access offers productized API-level integration with the leading medical devices to streamline the authentication workflow for clinicians. A single instance of Imprivata Medical Device Access will work across the ecosystem of medical devices, giving clinicians a consistent experience while reducing the total cost of IT ownership.

## About Imprivata

Imprivata, the healthcare IT security company, enables healthcare securely by establishing trust between people, technology, and information to address critical compliance and security challenges while improving productivity and the patient experience.

## Comprehensive auditing and reporting

Imprivata Medical Device Access offers detailed reporting capabilities to establish a secure, auditable chain of trust for medical device access. Imprivata Medical Device Access gives organisations better visibility into how, when, and where clinicians access and interact with patient health information on medical devices.

## Imprivata Medical Device Access

Imprivata Medical Device Access is part of a comprehensive identity and multifactor authentication platform for fast, secure authentication workflows across the healthcare enterprise. Imprivata Medical Device Access combines security and convenience by enabling fast, secure authentication across enterprise workflows while creating a secure, auditable chain of trust wherever, whenever, and however users interact with patient records and other sensitive data. Imprivata is working with leading medical device manufacturers such as Welch Allyn, Philips, and Capsule to better enable organizations to implement foundational security best practices with modalities that are tailored specifically to clinical workflows.
