

Imprivata Identity Governance

Fast, secure role-based access to systems and applications

Benefits

- Reduce IT costs by automating the identity management process
- Strengthen data security across the entire organization
- Empower care providers to deliver high-quality care with role-based, timely access to the right systems

Designed and built exclusively for healthcare, Imprivata Identity Governance™ is an end-to-end solution with precise role-based access controls, automated provisioning and de-provisioning, streamlined auditing processes, and analytics that enable faster threat evaluation and remediation.

Automate identity management, increase security

Securing and controlling access to protected health information is one of the most critical issues facing healthcare organizations today. Security incidents can disrupt patient care, while failure to comply with HIPAA privacy and security regulations can result in financial and criminal penalties. In response, healthcare organizations are implementing corporate governance, risk management, and compliance solutions that contain more secure and auditable controls as well as improvements to the monitoring and remediation of threats.

Imprivata Identity Governance automates the identity management process and empowers care providers to deliver high-quality care in a secure and compliant manner. Imprivata Identity Governance:

- Reduces IT costs by replacing burdensome, slow, and error-prone manual administering of user accounts while ensuring a high standard of security through efficient identity creation and termination
- Strengthens data security by streamlining auditing processes and providing compliance teams with rights and usage data in a single comprehensive report
- Empowers care providers to deliver high-quality care while increasing their productivity by ensuring correct, timely access

About Imprivata

Imprivata, the healthcare IT security company, enables healthcare securely by establishing trust between people, technology, and information to address critical compliance and security challenges while improving productivity and the patient experience.

Why choose Forward Advantage as your Imprivata Identity Governance reseller and deployment partner?

With more than 25 years of healthcare experience and a deep understanding of clinical workflows, Forward Advantage offers an exceptional customer experience from purchase through implementation and beyond. Our professional services are customizable to meet each customer's unique needs so you and your providers can spend more time on what really matters: improving patient health.

Let Forward Advantage help make your goals a reality. Talk to one of our solution experts today!

Key features of Imprivata Identity Governance

Same-day access rights to clinical systems

Care providers can access key clinical systems – from their first day at the organization to their last.

Self-service portal

Users can update their passwords and request additional application access quickly, without IT involvement.

Access and entitlement enforcement

IT and department heads can manage identity roles and entitlements over the lifecycle of a user, with workflow capabilities that allow for certification and remediation of access and entitlement rights.

Easy to use role management and configuration

Users can easily select, copy and make bulk edits to roles, streamlining the role management process. Application configuration is as simple as point and click.

Governance, risk management, and compliance dashboard

Compliance teams and security analysts can view complete user behavior and entitlements in reports that combine rights and usage data. The table below shows select examples of out-of-the-box reports.

Report name	Description
Role based application access statistics	Compare default applications in an identity governance role with corresponding users' Imprivata OneSign access data to refine default role assignments and eliminate over-assignment during on-boarding
Unauthorized application accounts	Compare user's Imprivata OneSign application access with their identity governance-assigned applications to determine any unauthorized access granted outside of Imprivata Identity Governance
AD reconciliation report	Lists all changes synced from Active Directory that did not originate from Imprivata Identity Governance
Out of role report	Identify users who have additional access beyond their role or are not in a defined role
User entitlement report	User application and entitlements, primarily used for periodic access reviews
Orphaned accounts	Lists users whose AD accounts have been disabled but certain application accounts are still enabled
Active accounts by application	Identity governance-managed application accounts that are active for licensing purpose for respective applications
Expiring users	Finds users who are about to expire or are expired

Imprivata identity and access management

Imprivata Identity Governance belongs to the Imprivata identity and access management (IAM) solution suite. Imprivata IAM solutions are purpose-built to meet healthcare's unique security and workflow challenges. Imprivata delivers end-to-end provisioning, seamless multifactor authentication, role-based access, ubiquitous single sign-on, and integrated governance and compliance to secure and manage digital identities across the healthcare ecosystem.
