

Imprivata Identity Governance

Fast, secure role-based access to systems and applications

Benefits

- Reduce IT costs by automating the identity management process
- Strengthen data security across the entire organization
- Empower care providers to deliver high-quality care with role-based, timely access to the right systems

Designed and built exclusively for healthcare, Imprivata Identity Governance™ is an end-to-end solution with precise role-based access controls, automated provisioning and de-provisioning, streamlined auditing processes, and analytics that enable faster threat evaluation and remediation.

Automate identity management, increase security

Securing and controlling access to protected health information is one of the most critical issues facing healthcare organizations today. Security incidents can disrupt patient care, while failure to comply with HIPAA privacy and security regulations can result in financial and criminal penalties. In response, healthcare organizations are implementing corporate governance, risk management, and compliance initiatives that require more secure and auditable controls as well as improvements in the monitoring and remediation of threats.

Imprivata Identity Governance automates the identity management process and empowers care providers to deliver high-quality care in a secure and compliant manner. Imprivata Identity Governance:

- Reduces IT costs by replacing burdensome, slow, and error-prone manual administering of user accounts while ensuring a high standard of security through efficient identity creation and termination
- Strengthens data security by streamlining auditing processes and providing compliance teams with rights and usage data in a single comprehensive report
- Empowers care providers to deliver high-quality care while increasing their productivity by ensuring correct, timely access

Key features of Imprivata Identity Governance

Governance, risk management, and compliance dashboard

Imprivata Identity Governance provides compliance teams and security analysts with a complete user behavior and entitlement view by combining rights and usage data in a single report.

Same-day access rights to clinical systems

Enable care providers to access key clinical systems – from their first day at the organization to their last.

About Imprivata

Imprivata, the healthcare IT security company, enables healthcare securely by establishing trust between people, technology, and information to address critical compliance and security challenges while improving productivity and the patient experience.

Self-service portal

The Imprivata Identity Governance self-service portal enables users to update their passwords and request additional application access quickly, without IT involvement.

Access and entitlement enforcement

Imprivata Identity Governance enables customers to manage identity roles and entitlements over the lifecycle of a user, with workflow capabilities that allow for certification and remediation of access and entitlement rights.

Integrated platform-level solution

When combined with the Imprivata authentication platform, which includes Imprivata OneSign® and Imprivata Confirm ID™, Imprivata Identity Governance provides a holistic view of risk vulnerabilities, including excessive or abnormal access rights and de-provisioned access.

- **Imprivata OneSign** – the leading healthcare enterprise single sign-on and virtual desktop access platform
- **Imprivata Confirm ID** – the comprehensive identity and multifactor authentication platform for fast, secure authentication workflows across the healthcare enterprise
