

Identity Governance & Administration

Solutions & Services to Help Manage Identity Lifecycles

More Connections Brings More Risk...

Technology continues to bring more users, applications and data together. With more connections, healthcare organizations face more vulnerability. An effective Identity Governance & Administration (IGA) program reduces business risk while offering operational efficiencies. Can you quickly answer these important questions about your data and applications:

This challenge is common among healthcare organizations and finding the right combination of solutions and services to manage the complexities of identities is crucial.

The Solution

An effective Identity Governance & Administration (IGA) strategy has the power to enhance onboarding while improving security, auditability, reportability and user identity management – all from a centralized location.

Forward Advantage is an authorized reseller and implementer of leading IGA solutions from Imprivata and SailPoint. Our experts have decades of experience working in healthcare with leading EHRs, VDI infrastructures, single sign-on and advanced authentication solutions. We can assist you throughout your entire IGA journey to ensure your identity objectives are met long into the future.

Objective, Healthcare Expertise

We offer strategic guidance throughout your entire IGA journey to ensure identity objectives are met now and into the future. Our approach is to provide tailored solutions and services, not a one-size-fits-all product.

Scalable Solutions and Services to Meet Your Evolving Needs

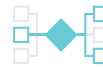

As your organization changes due to addition of new identities, mergers, acquisitions and divestitures, IGA solutions are scalable to ensure your end users are unaffected. Forward Advantage will provide guidance to successfully manage identities.

Building a Successful IGA Program

Along with improving compliance and strengthening security, Forward Advantage can help you build an effective IGA program that meets your evolving needs.

Adapt to your technology strategy (cloud, on-prem, etc.)

Streamline end user access to critical applications & data

Provide auditing and access controls to know who has access to what

Build on and strengthen your current identity management approach

Address security challenges and initiatives related to access controls
